A passionate software engineer dedicated to continuous growth in both technical and interpersonal skills, with a focus on leveraging emerging technologies to drive team and business success.

Relevant Experience

Software Engineer
Sence1 Inc.
Nov 2023 - Present

- Played a key role in conceptualizing, planning, and implementing innovative company services, including a manpower service platform and scholarship pooling system
- Built responsive user interfaces using ReactJS, NextJS, Redux, and MaterialUI while providing cross-functional support for backend systems developed with Rails and Laravel.
- Leveraged design expertise to establish company brand identity through creation of professional collateral including ID cards, business cards, and virtual meeting backgrounds.
- Expanded skill set by collaborating with the analytics team to implement data tracking and reporting solutions using Google Tag Manager and Analytics.
- Helped development of the company's new website from initial concept through design and implementation, ensuring alignment with business objectives and brand standards.

Web Developer
DuthDigital (Freelance - Part-time)
Sep 2024 - Present

- Designed and delivered 5+ WordPress and 2+ Webflow sites for diverse business clients, ensuring high-quality, responsive designs that aligned with client brand requirements.
- Independently managed end-to-end website development lifecycle including planning, hosting configuration, domain setup, custom coding, and deployment for all client projects.
- Implemented comprehensive SEO optimization, security hardening, and performance enhancements that improved site speed, search visibility, and overall user experience.

Web Developer
CREATIVEHOPE PH INC.
Oct 2022 - Oct 2024

Junior Web Developer
Oct 2021 - Sep 2022

- Managed 5+ concurrent development projects for Japanese headquarters (CREATIVEHOPE INC.), ensuring seamless international coordination and consistent on-time delivery.
- Developed and maintained 3+ new website features monthly using jQuery, PHP, HTML, and CSS, improving site functionality and user experience.
- Managed CRM development across 3 major projects, leveraging diverse platforms including Hubspot, Salesforce Pardot, Movable Type, and WordPress to streamline client operations.
- Developed and maintained a comprehensive marketing system using ReactJS and Ruby on Rails that enabled the creation of 70+ landing pages and 20+ reusable templates, ensuring standardized design elements and brand consistency.
